

Village NOTES

“A Village in the City”

Winter 2017

Note from the Mayor

IN THIS EDITION:

- COLLABORATIVE REFORM INITIATIVE
- CITY RECEIVES \$10,565,371 FROM UNITED STATES ARMY
- ENGINEERING UPDATES

Dear Residents,

Another year has passed and there have been some trials and tribulations, but along with those there have also been numerous successes.

We need not dwell on the past but review it reflectively with understanding and take away lessons learned so we can do better in the future. We are not always as successful as we strive for but we never give up that ambition and settle for mediocrity. As an optimistic person I always felt there will be a greater tomorrow, as most people want and desire fostering improvement physically, spiritually and intellectually.

The Advance Oxidation Process (AOP) plant is being constructed and should be operational this late summer early fall. It has been fully funded by the US Army and we have not exceeded the State standards on 1,4 Dioxane. Additionally, we will continue our road reconstruction and sustainability initiatives. Our efforts on social equity and justice continue as all members of the human race should be able to fulfill their maximum capabilities.

Throughout our history many men and women have answered the call of service to our country in myriad forms and with that they understood that it was the mission that was most important and they relegated their individual well-being to that of the mission. To that end we should all honor that service and sacrifice and be grateful for their resolve and strive to epitomize those traits.

With the election recently completed it is important that we all take a step back and listen to the other side. That does not mean capitulating your principles or conversely gloating over the results, it just means listening with an open mind. One thing that I have learned in my life is no one institution be that political, religious or mercantile has all the answers. Everyone brings some good points to the table but none of them are an absolute authority. Neither are we as individuals, as hard as that is to accept; therefore, it is incumbent that we seek to hear and listen to different points of view.

It is far better for all of us to listen more than shout out our opinions. As the saying goes “we were blessed with two ears and one mouth, so use them in proportion.” I know that I can only change myself – I cannot change anyone else – and others can only change themselves. So our rhetoric needs to be toned down and our conversations thoughtful and respectful using reason and substantiated facts to proffer our assertions. “Most people do not listen with the intent to understand; they listen with the intent to reply”, that according to author Stephen Covey, *The 7 Habits of Highly Effective People* and maybe that should be our New Year’s resolution.

We will continue to improve our community with positive actions and respecting those that do not share our view. Thereby demonstrating that democracy is alive and well in St Anthony and in America.

My best regards
Jerry Faust

COLLABORATIVE REFORM INITIATIVE

by Mark Casey, City Manager

At the request of the City of St. Anthony, the United States Department of Justice (DOJ) has accepted us into the Office of Community Oriented Policing Services (COPS) Collaborative Reform Initiative for Technical Assistance (CRI-TA). CRI-TA is focused on helping cities find and implement ways to improve trust between law enforcement agencies and the communities they serve by providing a means to organizational transformation.

The CRI-TA uses assessment and technical assistance providers to coordinate the work through the involvement of subject matter experts, interviews, data and records analysis, research and analysis, and direct observations.

The mayor, city council and staff are excited to begin this multi-year process of identifying issues and enhancing the relationships within our community.

One of our fundamental goals is to create systems that are sustainable and able to become embedded in the fabric of our community. It is critically important that we hear from **all** voices of our community and we hope you take advantage of the numerous engagement opportunities. Please see insert for more information or visit our website at www.ci.saint-anthony.mn.us

2016 ELECTION RECAP

The 2016 Presidential Election was a busy election for St. Anthony!

93% of the registered voters in St. Anthony participated in the election this year! That's up from **87%** in 2012.

New this year was no excuse absentee voting.

This year nearly **22%** of voters in St. Anthony voted absentee by mail or prior to election day.

1 out of 5 people who voted in St. Anthony voted absentee!

FIRE POSTER CONTEST WINNERS

At it's November 22 meeting, the City Council recognized the Fire Prevention Contest winners:

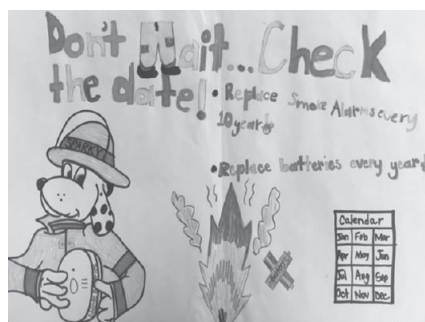

1st Place
Ledia Lema

3rd Place
Norah Telander

2nd Place
Leila Pilipovic

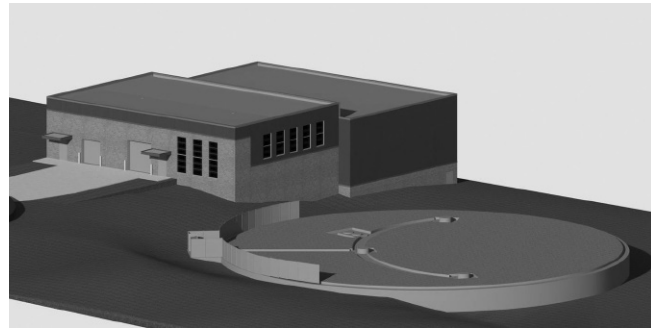

4th Place
Jacob Bogucki

CITY RECEIVES \$10,565,371 FROM UNITED STATES ARMY

by Mark Casey, City Manager

We are excited to announce the City of St. Anthony has received \$10,565,371 from the United States Army for the construction of the Advance Oxidation Process (AOP) expansion to the water treatment plant. Construction has already begun and we anticipate the AOP to be fully on-line and operational by August.

To retrace this past year, in February 2015 the contaminant 1,4 – dioxane was discovered in the same aquifer that our drinking water comes from. Immediately, the City of St. Anthony began testing our wells and, throughout this entire time, the City of St. Anthony's drinking water has not exceeded the 1 part per billion health advisory level established by the Minnesota Department of Health (MDH). A thorough explanation is available in the Spring 2016 city newsletter still available on the city website, with additional updates in subsequent newsletters and postings. A fast track approach was arrived at early in the process due to the cooperative spirit adopted by both the United States Army and the city leadership.

With a dedicated team of staff under guidance from the Mayor & Council, the AOP solution was deemed to be the most cost effective and environmentally conscious alternative. The \$10,565,371 includes:

- Construction of the AOP plant addition
- Allowances for contingencies and ancillary equipment needed
- Modifications to existing system for blending from multiple wells
- Refunding of lost revenues due to water restrictions
- Compensation for temporary closures of splash pads
- Relocation costs for half-court basketball facility
- Reimbursement for legal, engineering and staff time.

The AOP expansion provides assurances to residents that the City of St. Anthony will continue to deliver safe and reliable drinking water. Furthermore, through this process, the City of St. Anthony continues to be a leader in environmental sustainability by removing a contaminant from an aquifer that stretches far beyond our city limits. As the recipient of the League of Minnesota Cities' City of Excellence Sustainable City Award, we again demonstrate our commitment to local action for a greater good.

THE PROBLEM WITH PAINT

Unwanted paint can be a problem. Leftover liquid paint doesn't belong in the trash. Both oil and latex paints need to be disposed of properly. When discarded in the trash, the paint creates problems for waste collectors and for facilities that process our garbage.

Oil-Based Paint

Oil-based paint contains hazardous ingredients. Do not put it in the trash and do not mix it with latex paint. Take leftover oil-based paint to your county household hazardous waste (HHW) drop-off site.

Latex Paint

The best option is to use your leftover paint, or find someone who can. If you can't use it up, you can bring in your latex paint to your county's HHW drop-off site to be recycled. If you have a small amount of latex paint that has completely dried out, you can place it in the trash with the lid off.

Take leftover oil-based paint and liquid latex paint to your county HHW drop-off site. Visit RethinkRecycling.com/hhw to find your county's HHW drop-off site.

For more recycling information visit:

RamseyRecycles.com

ENGINEERING UPDATES

2017 Street and Utility Improvement Project

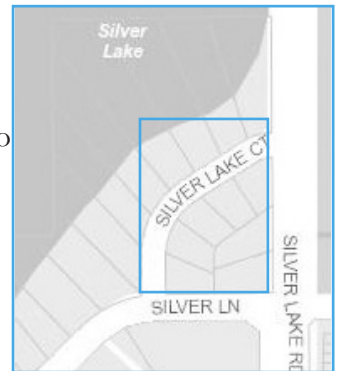

The 2017 Street and Utility Improvement Project consists of complete street and utility reconstruction along the following roadways (illustrated below):

- Penrod Lane from 36th Avenue NE to Skycroft Drive NE
- Skycroft Drive from Penrod Lane to Maplewood Drive
- Chelmsford Road from 36th Avenue NE to Maplewood Drive
- Maplewood Drive from Skycroft Drive to Highcrest Road (including cul-de-sacs to the north)

Also, proposed for improvement in 2017 is the bituminous mill and overlay along Silver Lake Court from Silver Lane to the cul-de-sac (illustrated below).

The projects are currently out for bid with the project anticipated to be awarded to the lowest responsive and responsible bidder in late February of 2017.

AUTOMATIC EMAIL NOTIFICATIONS!

Sign up to receive updates on any of these projects.

Visit www.ci.saint-anthony.mn.us and select Email Notifications located on the left sidebar.

Advanced Oxidation Process Water Treatment Plant

The addition to the water treatment plant was designed in early 2016, with bids received in August of 2016. The contract was awarded to Gridor Construction, Inc. of Buffalo, MN, and construction began in September of 2016. The Contractor has completed installation of the foundation and walls of the building, including masonry, plumbing, and electrical. The Contractor is anticipated to continue construction of the new building throughout the spring with completion anticipated in late summer of 2017.

Highway Safety Improvement Program (HSIP) Project

Bids were received on September 15, 2016. Bids received were higher than anticipated and the project was NOT awarded by the City Council. The project is proposed to be re-bid in January of 2017.

Sidewalk improvements along Stinson Boulevard, originally proposed to be included with the HSIP project, were solicited to contractors and awarded to Concrete Idea, Inc. The sidewalk along Stinson Boulevard was installed this past fall to coincide with the completion of the 2016 Street and Utility Improvement Project.

ENGINEERING UPDATES

Mirror Lake Water Quality and Flood Mitigation Improvement Project

The contractor has dewatered the lake and has completed the storm sewer installation. Once the lake bottom freezes the contractor will begin the tree removal and excavation of the nutrient rich soils. Final shoreline restoration will occur in the spring of 2017 along with the installation of the outlet control structure.

If you have questions regarding any of the projects above, please feel free to contact Justin Messner, the Project Manager, at (651)286-8465.

ILLICIT DISCHARGE FACT SHEET

Have you ever seen your neighbor blowing leaves or lawn clippings into the street? Or how about seeing someone dumping paint or used oil into the storm drain? Have you ever seen any murky water running down the ditch? What we do at home affects our local water resources because our storm drains and ditches are connected to nearby lakes, rivers, and streams. Remember, **only rain down the drain**. Below are examples of illicit discharges. If discovered, please contact the City at (612) 782-3301.

As an MS4 (Municipal Separate Storm Sewer System) community, St. Anthony regulates non-stormwater discharges to the storm drainage system. The City's Code Chapter 50: Storm Water and Sanitary Sewers, Section 50.30 – Illicit Discharge and Connection contains enforcement actions the City can take in the event an illicit discharge occurs.

Sources of Illicit Discharge:

- Sanitary wastewater
- Sediment from construction site runoff
- Landscape waste
- Paints, solvents
- Used oil, radiator flushing, grease
- Cleaning products
- Spills from accidents
- Improper disposal of household toxics
- Laundry wastewaters
- Illegal connections to the storm sewer system
- Commercial car wash wastewater

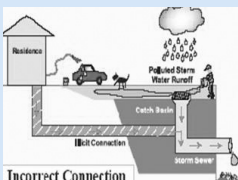

Illegal Dumping

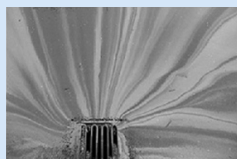

Grass Clippings

Construction Site Runoff

Illegal Connection to the Storm Sewer

Oils and Solvents

Car Leaking Fluids

WINTER PARKING AND SNOW PLOWING

by Jay Hartman, Public Works Director

During the winter, the number one priority of the Public Works Department is to clear the snow and make St. Anthony's streets safe for traffic and emergency vehicles. Here are a few reminders to assist residents in achieving this goal:

Residents are NOT allowed to park on ANY street for a period of 48 hours, beginning immediately after two (2) inches or more of continuous snow fall or until the snow removal has been completed from curb to curb.

The City understands that sometimes the schedule for snow removal doesn't correlate with residents' snow shoveling schedules. The snow plow drivers do their best to avoid pushing windrows of snow back onto freshly shoveled driveways or sidewalks.

Remember it is dangerous for children to dig tunnels in the windrows of snow created by the snow plows. Tunnels can cave in, smothering the child. Plow drivers can't see children playing in or around the windrows and they can be covered or trapped in the snow.

Other ways to assist with snow removal operations include:

- *Don't place refuse or recycling containers in the street; and
- *Don't plow, blow or shovel snow into the street; and
- *When shoveling, pile snow downstream of the plowing operations to minimize snow left in your driveway; and
- *Stay back when driving behind plow trucks.

With your cooperation, snow removal can be more efficient and roads cleared in very little time. If you have any questions regarding our snow plowing procedures, contact Jay Hartman, Public Works Director by email jay.hartman@ci.saint-anthony.mn.us or call 612-782-3314. We appreciate your cooperation during snow plowing events.

RECYCLE YOUR UNWANTED HOLIDAY LIGHTS!

The City of St. Anthony is accepting unwanted holiday lights through the end of January. Your lights can be deposited in the container located at the Community Center outside of City Hall.

WATER & SEWER EMERGENCIES

If you have a water or sewer emergency, contact city offices immediately at 612-782-3301 during normal business hours.

For after hours service, contact the Fire Department at 612-782-3400.

City crews will be dispatched to evaluate the situation and assist the property owner. Remember, the property owner is responsible for maintaining water or sanitary sewer service from their building up to and including the connection to the main water or sewer lines.

ST. ANTHONY VILLAGE WINE AND SPIRITS!

Our Municipal Liquor Stores contributing to the community since 1948

by Mike Larson, Operations Manager

Now that the year 2016 is over, the staff at your Municipal Liquor Stores will begin evaluating our successes and failures during 2016. Our goal is to improve our operation and determine what we can do to provide a better shopping experience for our customers. Our mission to “control the sale of alcohol while simultaneously generating revenue” will not change, but our goals to continue the mission may be adjusted to maximize our efforts and produce the best results.

The 2016 financial statement was not completed in time for this publication but early figures indicate that our sales dropped slightly and net profit increased. We will continue to implement new retail initiatives to increase sales and profits.

It is important for our customers and residents to remember that our profits are used for the benefit of

the community. While you are enjoying our beautiful parks and city services that our Police, Fire and Public Works Departments provide, remember that our liquor stores contribute to the funding for equipment to maintain the services. We want to thank our customers for shopping at our stores and keeping the profits in our community!

We continue to look forward to serving our customers and St. Anthony Village! Please contact me if we can assist you with anything that would provide a better shopping experience for you and your neighbors. I can be contacted by phone at (612) 782-3455, or feel free to email me at mike.larson@ci.saint-anthony.mn.us.

Thank you for allowing us the opportunity to serve you!

ADOPT A FIRE HYDRANT

The St. Anthony Fire Department would appreciate residents' help in keeping the snow cleared away from pathways and fire hydrants. The accumulation of excess snow blocks the view of responding fire personnel to fire hydrant locations. Precious time is lost when firefighters have to look for and uncover fire hydrants. Please help by occasionally shoveling around the fire hydrants, keeping them accessible. Your assistance is greatly appreciated!

OUTDOOR RINKS

by Jeremy Gumke, Public Works Superintendent

Looking for a free recreational activity for your family? St. Anthony offers outdoor skating at three locations.

Central Park
Silver Lake Rd

Emerald Park
3925 Macalaster Dr

Silver Point Park
3010- 29th Ave

Hours of Operation are:

Monday - Friday 4:00 pm to 8:30 pm

Saturday 10:00 am to 8:30 pm

Sunday 1:00 pm to 8:30 pm

Hockey and pleasure rinks are available at all locations. Also, there are warming houses at all of the locations and all facilities are supervised.

During school holidays, the rinks will be open from 10 am to 8:30 pm, except on Sundays. Get out and enjoy the winter with some outside skating.

CARBON MONOXIDE AND YOUR HOME

by Mattie Jaros, Firefighter

Carbon Monoxide (CO) is often referred to as the “invisible killer” due to the poisonous gas being colorless and odorless. CO is the product of incomplete combustion. Appliances in the home such as gas furnaces, stove ranges, dryers and fire places, are all sources of CO. CO is released when these appliances malfunction or are improperly installed. More than 400 Americans die each year from unintentional CO poisoning. With thousands more hospitalized, these are statistics that can be prevented.

CO in the body produces flu-like symptoms due to the carbon monoxide inhibiting the blood’s ability to carry oxygen throughout your body. Initial symptoms can include dizziness, severe headache, nausea, fatigue

and confusion. In extreme exposure, unconsciousness, brain damage, heart failure, lung failure, and sometimes death.

The first step you can take to keep you and your family safe is by installing Carbon Monoxide detectors on every level of your home, especially near sleeping areas. The only way to detect CO in your home is with a CO detector. Never leave your car idling in a closed garage or use fuel-powered appliances and/or tools in an area with poor ventilation. Lastly, with the winter months upon us never use a gas range/stove to heat your home!

ACRONYMS, TAG-LINES, CATCHWORDSWHAT DO THEY ALL MEAN?

by Shelly Rueckert, Finance Director

After recently participating in a conference call regarding a software upgrade, I was left wondering how many three-four letter acronyms exist in the IT environment! Upon reflection, I thought the same could be said about the language used when discussing City Finances. The certain phrases and key words that have significant meaning within City Hall may fall flat Citywide. Therefore, I have highlighted below certain terms often used by City Finance and their meaning in terms of impact to City residents and businesses.

- Sustainability – The continued ability to provide City Services at the level residents and businesses are accustomed.
- Structurally Balanced – Revenues and fees are set at rates necessary to meet the annual cost of the service provided. Using this approach provides for reasonable year to year adjustments in rates. Thus, providing a degree of predictability for residents and businesses as to the costs paid for city services and avoiding spikes in rate adjustments.
- Fund Balance Policy – Retaining sufficient cash holdings to meet day to day operating needs. The City’s core operating funds receive tax collections in July and December. Therefore the cash on hand at year end along with subsequent revenues are projected annually as to ensure timely payments of City obligations.

The above would be my “big three” in phrases often used. If there are any others you have heard and want background as to their meaning or impact, feel free to contact me at shelly.rueckert@ci.saint-anthony.mn.us

AVOIDING TAX-RELATED IDENTITY THEFT

by Mike Huddle, Police Sergeant

Winter is upon us. A new year is upon us. Tax season is upon us. And with that, we'll all need to do what we can to protect ourselves from tax fraud and identity thieves. It's a scary thing. But, the IRS provides resources and references to help you protect your tax-related identity information. Many of these are simple tips we can easily do ourselves which will make it harder for scammers, hackers and thieves to steal our sensitive information. You can find all of this information on the IRS website, www.irs.gov, and simply searching the site for "tax security".

The IRS recommends the following steps to protect from becoming a tax related identity theft victim:

- Use security software and keep it up to date
 - The software should include virus and malware protection
 - File encryption capability
 - Firewall
- Use strong passwords (10 to 12 characters that include numbers and symbols)
- Only send personal information over encrypted/secure websites – check for "https" in the web address
- Back up your computer files on a removable disk or hard drive
- Research companies to determine who you're really dealing with online
- Do not leave personal information lying around or up on a computer screen

Beware of phishing emails, phone calls, or texts that appear to be from the IRS, or financial institutions you might be familiar with and normally trust. Go directly to the company's website to check for legitimate information. Don't click on links from suspicious or unknown emails, or download attachments if you don't know who sent it or aren't sure of what it is. Do not install or download software unless it's from a company or website you trust and are familiar with. Use a pop-up blocker on your web browser.

Don't fall victim to IRS impersonators. The IRS does not call taxpayers and threaten lawsuits, arrest, or jail. The IRS also does not send unsolicited email requesting that you update your account, provide sensitive personal or financial information online, or to inform you of a refund. The IRS does not initiate contact through text message or social media. These are all indications of scams. Report IRS scam emails to phishing@irs.gov, and IRS impersonation phone calls as www.tigta.gov (I've visited this website, which takes you to the Treasury Inspector General for Tax Administration web site). There is an IRS impersonation scan reporting link on the upper right side of the web page.

The IRS suggests annually checking your Social Security Administration records by signing up for My Social Security at www.ssa.gov. The IRS also reminds us to check your credit report annually and to regularly check bank and credit card statements. If you are a victim of tax related identity theft, please go to www.irs.gov/identitytheft for what to do next.

PARKS COMMISSION

Thank You & Welcome Aboard!

Thank you to Roy Quady for his service on the Parks Commission!

The City of St. Anthony welcomes Marnie Overman to the Parks Commission. We appreciate your willingness to serve our community!

COMPREHENSIVE PLAN PROCESS CONTINUES

by Breanne Rothstein, Planner

The City is in the middle of updating the Comprehensive Plan that guides city policy related to land use and infrastructure through the year 2040. State Statute requires that every city in the seven county Twin Cities metropolitan area update their plan by the end of 2018. This process is a chance to engage with residents, businesses, and Planning Commission/City Council in the vision for the next 25 years for growth, stability, infrastructure, and housing in the community. City staff undertook a large community visioning effort earlier in 2016, and received great feedback on the priorities of the community. Top priorities include: making the city more walk and bicycle friendly, continuing to be leaders in sustainability efforts around energy and

water, examining future re-uses for the Walmart site and former bowling alley site, encouraging a multi-generational community, and maintaining and increasing the supply of affordable housing. Currently, the city is undertaking the infrastructure analysis related to sewer, water, and transportation as required by the Metropolitan Council. The City will be finishing the Comprehensive Plan in the summer and fall of 2017.

It's not too late to participate! Check out our website at: www.ci.saint-anthony.mn.us and click on Comprehensive Plan. You can participate in online surveys and questions and review summaries of the work completed to date. Also, stay tuned for information about an Open House to review the draft land use plan this summer.

PLANNING COMMISSION

by Jim Gondorchin, Planning Commission Chair

The Planning Commission is a seven-person body meeting the fourth Monday evening of each month at 7PM in the City Council Chambers. Typical agenda items include: land use and development, city ordinance modifications and variance requests made by both residents and businesses. While regular Planning Commission meetings during 2016 were comprised primarily of the more routine

matters, members attended “work sessions” dedicated to development of the Comprehensive Plan which on occasion featured community development consultants. Members also participated in citizen engagement meetings where a variety of topics essential to city residents were identified, discussed and incorporated into the Comprehensive Plan. There was not a scheduled meeting this past December, but after the first of 2017 efforts will refocus on completion of the Comprehensive Plan and begin review of proposed redevelopment of the Lowry Grove property.

PARKS COMMISSION

by Scott Bentz, Parks Commission Chair

The Saint Anthony Parks Commission is a 5 member advisory commission appointed by the City Council. In 2016 the commission expanded it's work to include sustainability initiatives such as becoming a Tree City USA. In 2017 we plan to continue that work which will include:

- Continue and expand sustainability initiatives such as the rain barrel workshop and pollinator gardens.
- Explore pedestrian and bike friendly routes.
- Assess pocket parks for potential added amenities.
- Partner with schools and Rice Creek and Mississippi Watershed Management Organizations to create water conservation

education and initiatives. We will also be looking at ways to continually improve our current parks. If you have any ideas for sustainability or improving St. Anthonys parks, please attend one of our meetings or contact Jay Hartman, Public Works Director at jay.hartman@ci.saint-anthony.mn.us or call 612-782-3314.

ST ANTHONY VILLAGE AREA CHAMBER OF COMMERCE

UPCOMING EVENTS

Tuesday, January 17, 12 noon - Lunch & Learn Meeting
Workplace Violence: Identifying Risk Factors and Prevention Strategies with Local Law Enforcement Partners, presented by Sgt. Mike Huddle with the St Anthony Police Department - St Anthony City Hall/Council Chambers - 3301 Silver Lake Road, St Anthony

For more information on these and other events, please visit the chamber website
www.saintanthonychamber.org

Wednesday, February 15, 7:30 a.m. Chamber Coffee Club Networking Meeting
Start your day with the St Anthony Village Area Chamber of Commerce - make valuable business connections - find out about upcoming Chamber events and ways for you to get involved! Stay for a quick cup o' joe or for the entire hour! The Coffee Shop Northeast - 2852 Johnson Street, Minneapolis

February 2017 - Member Appreciation Happy Hour - Location and date TBD

Tuesday, March 21, 12 noon - Lunch & Learn Meeting
Chris Petersen, owner of Watchdog Security Technology, a Saint Anthony-based computer service business for home and small-business owners. Backups - what a good one looks like, why it's good to have a local as well as a cloud backup, rotating backup drives, keeping offsite, etc. & learn some inexpensive ways to accomplish this. Also being covered is security-layered defense using antivirus, firewall, other software, and user education.

"SHOULD OLD ACQUAINTANCE BE FORGOT, AND NEVER THOUGHT UPON..." WE ARE COMBATING THIS FOR "OLD TIMES SAKE"

by Barry Tedlund, St. Anthony Village Historical Society

This song is all about preserving old friendships and looking back over the events of the year. This is a big part of our mission. Here is the latest from the history making department:

- We are working to gather individual memories from the St. Anthony Tornado of 1984. We have been learning of the challenges of that devastating day and triumphs of overcoming the life-changing impact it made on many people. In many cases, it took a Village to help regain our composure to attain life back to normal again. We want to gather these stories of survival. Please help us with your memories...
- We are also pursuing printing more of "A Village in the City". This book covers the history of St. Anthony from the early years. Would you be interested in a book(s)?
- Lastly, if you enjoy history, we have been a part of a lot of history right here in St. Anthony. Please support our efforts with your membership today!

Please reach out to me with any questions or interest of support at b.tedlund@gmail.com or 651-472-4968.

SISTER CITY ASSOCIATION HOSTED SPEAKER ON FINNISH EDUCATION SYSTEM

The St. Anthony Sister City Association held its annual meeting on Sunday, November 13, 2016, at City Hall. The speaker was Kirsi Leskinen, a Fulbright Foreign Language Teaching Assistant at the University of Minnesota. A native of Finland with a varied teaching background, Kirsi shared her experiences as both a teacher and student in the Finnish education system, which is widely regarded as the best in the world. Among the fascinating facts she shared: during the first nine years of formal education, children have 15 minutes of recess for every 45 minutes of class time!

St. Anthony's Sister City is Salo, Finland. To learn more about the Sister City Association, search for us on Facebook @StAnthonySisterCity, or visit the City of St. Anthony website.
