

## 2017 Street and Utility Improvement Project and Appurtenant Work Construction Update #4

### Current Events

The first planned activities the week of April 3, 2017 are:

- setting up traffic control signs
- tree removals
- installing temporary water system

Center Point Energy will begin replacing existing gas main along the south side of Maplewood Drive.

### Future Events

The Contractor anticipates the start of roadway and driveway pavement removals the Week of April 10, 2017.  
*The above schedule is tentative and is subject to change due to weather or scheduling conflicts.*

### Staking on the Project

Stakes set within the project boundaries tell the contractor where new pipe and drainage structures go for the storm sewer and water main. This includes areas where manholes must be raised or lowered and hydrants moved. Stakes are marked with pink paint or ribbon and are offset from the actual pipe or structure.

When the streets are staked for curb and gutter or utilities, the stakes are labeled with an "O" with an "S" inside it. These letters mean the stake is offset the distance marked on the stake, such as 10 feet. The mark "3' B/C" indicates that the stake is offset three feet from the back of the new curb (ie, the back of curb will be three feet closer to the center of the street than the stake).

Please be careful not to disturb the stakes or move them from their original locations.

### Tips of the Week

- Please remind children to stay away from the construction site, equipment, and stockpiles of materials.
- Please observe posted detour and warning signs.
- Stay alert! Watch for signs, equipment, and workers

### Project Contacts

Onsite Project Rep: Ben Perkey (612) 360-1319

Project Manager: Justin Messner (612) 388-9652

City Engineer: Todd Hubmer (763) 287-7182

Director of Public Works: Jay Hartman (612) 782-3314
