

We would like you to attend our Construction Education and Safety Meeting

The City of St. Anthony Village invites you to attend a public education meeting to discuss and share information about Street and Utility construction.

Do you want to know:

- Why do you dig through the road more than one time?
- How does an excavator work?
- Ever want to touch a dozer?
- What are the most common types of construction injuries?
- How can I navigate a construction site without risking injuries to the workers?
- Can my kid climb on the equipment?
- What is the proper technique for leaning on a shovel?
- What is a sheep's foot, and why is it important?

Join us at the meeting, where you will learn answers to these questions and more!

WE WELCOME ANY QUESTIONS YOU MAY HAVE!

WHERE: Park Entrance at Maplewood Drive and Skycroft Road, St. Anthony Village, MN

WHEN: Monday, May 15, 2017, at 5:00 p.m.

If you have any questions but are unable to attend, please call me at 763-287-7182.

Thank you,
Todd Hubmer
City Engineer
